Be Connected

A new solution for meeting

**BeConn series**

Be Connected

“ In the future, the competitive advantage of the enterprise will be the ability to collaborate effectively to connect the resources that are scattered within the organization.”

- Morten T. Hansen

## Why is collaboration attracting attention in recent years?

As the business environment becomes more complicated and competition becomes more intense, companies have more specialized and more specialized human and material resources for survival and growth. And we are looking forward to collaborating to connect these resources.

There is not much we can do independently in our workspace

A lot of things, from contracts between companies, to division of work between the departments and the team, or to consultations, are decided and carried out in the conference room

Q. Do you think collaboration needs to be strengthened to increase work productivity?

A. It needs to be strengthened. (59%)

Q. Is your job a task that can be done independently, without collaboration with your team or team members?

A. No. (51.4%)

There has already been sufficient consensus on the importance of collaboration. A survey of over 6,000 employees found that 59% I think that cooperation should be strengthened to increase productivity and 51.4% of the employees in the case of the big company A answered that their work can be done through collaboration.

Source | Fursys

“In fact, 65-75% of communications are non-verbal elements.”

- Susanne Jones

## How do they want to collaborate?

According to Forbes, corporate executives prefer face-to-face communication because they can form more meaningful business relationships when they meet face-to-face.

“Of the 760 corporate executives, 84 percent preferred face-to-face communication.”

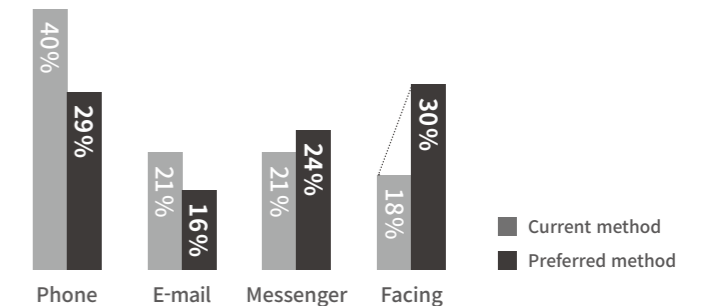

- Forbes

While the means of communication have been digitally transformed, there has been a lot of change, but it cannot completely replace traditional communication. This is why we pay attention to the collaborative space.

Thanks to IT technology, we have been able to do business without having to meet face to face, but we still go to the meeting room several times a day.

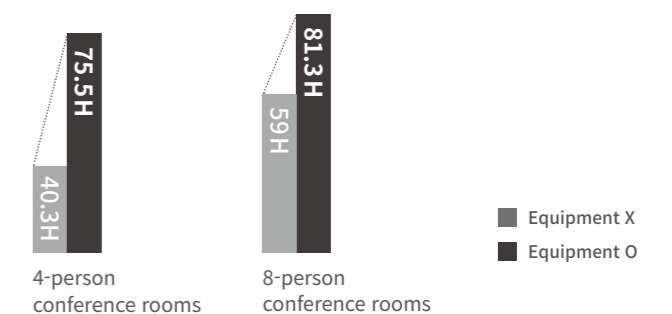

Q. How do you collaborate now, and what do you want to collaborate with?

A. I want to increase face-to-face communication.

Q. How will display equipment affect the use of the conference room?

A. More preferred when equipment is available.

The means of communication have been digitized, but in reality many people want to reduce the number of calls or mail and increase the number of hands-on collaborations. In addition, the results of the 8-week experiment show that 87% of 4-person conference rooms and 38% of 8-person conference rooms have an increase in use time compared to when no display equipment is available.

Conference system

## BeConn

BeConn is designed to connect people, thoughts and ideas so they can collaborate and communicate more quickly, easily, and more effectively.

We propose BeConn to people who are aware of the importance of collaboration, who wants various collaborative spaces, and those who are looking for a space where they can share and communicate digital contents smoothly.

BeConn is a compact, simple and sleek design table, a stand that allows you to install and use a shared monitor, and various accessories to help you store and collaborate.

All of these items are available in a variety of colors and materials to suit your taste and space.

**What  
connects you  
to your  
work?**

BeConn

## What connects you to your work?

### 4 PEOPLE or LESS

Small collaborative space for close collaboration

### 6~8 PEOPLE

Most planned medium-sized collaboration space

### 10 PEOPLE or MORE

Formal meeting room or free collaborative space

Chair Button

## Planning for 4 PEOPLE or LESS

Conference rooms of one or two people are useful for confidential meetings and interviews, and are also good for concentration work. 4 people or less of conference are most frequent for dense collaborations and have many casual forms. <sup>1)</sup> Convenient display equipment and a whiteboard are provided, and comfortable furniture is arranged for free communication space.

In particular, the 4-person conference room has a 87% increase in the use of the conference room when the display equipment is not installed, so you can check your needs for a convenient communication environment. <sup>2)</sup>

<sup>1)</sup> Survey results of 1,500 domestic manufacturing companies, FURSYS, 2014

<sup>2)</sup> Results of 8-week conference room usage rate based on ITC product availability, FURSYS, 2014

**Various small conference room  
by using Mix & match**

Small conference rooms actively use color in furniture and interior, and often produce a creative, space by placing various items such as chairs, sofas and stools together.

The D-shaped conference table allows you to share the screen while maintaining a comfortable viewing angle, so you can use it effectively for collaboration.

Table BeConn - D shaped table

Stool Square / Fungus

**Collaborative space  
that freely configures office**

We are planning various forms of collaboration space.

Because small meetings occur frequently throughout offices. The combination of tables and chairs is the most common, but recently, various combinations of items such as sofas, stools, boards, and standing tables have attracted attention.

If you place them in an underused space or a window, you can utilize office space more diversely.

Table BeConn - Round table  
Square - Tea table  
Sofa Square - Mid back sofa

If you have a casual sense of style and a unique design sense, you can create a meeting space that is out of the conventional framework.

 TV Stand BeConn

Planning for

## 6~8 PEOPLE

Meeting rooms for 6-8 persons were surveyed as the most planned in the domestic office. <sup>1)</sup> This space is based on a conference table that is easy to use for personal devices such as laptop and tablets.

In addition, functional chairs, whiteboards, and display devices that can share the screen to support the optimal collaboration environment.

The most popular meeting rooms for 6 to 8-person show a 38% increase in usage rate when display equipment is installed as the conference method of sharing visual data became frequent. <sup>2)</sup>

1) Space Database, Fursys

2) Survey results of 8-week conference room use rate based on ITC product availability, FURSIS 2014

**Collaborative environment combined with convenient technology**

Easy to use personal devices and screen-sharing systems increase collaboration efficiency. Combination of wood tone and blue color creates a relaxed, natural atmosphere. You can freely share ideas and information in these meeting spaces.

Table **BeConn - 2000 Table**  
Chair **VIM**

**Collaborative space to stimulate creative ideas**

Matching stool with unique design and fresh colors makes it a fun and cooperative space for co-workers. A space emphasizing design sensitivity stimulates creative ideas and leads to active collaboration.

Table **BeConn - 1600 Table**  
Stool **Square / Fungus**

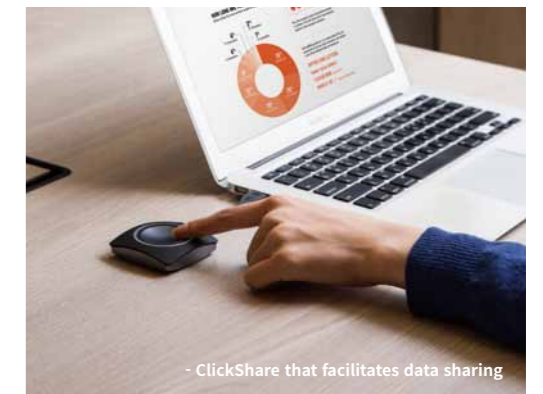

**Collaborative environment  
for easy data-sharing**

The display-equipped environment has become a necessity by making data sharing and research easy, and helps you get the job done immediately. Functional chairs with a sense of design can comfortably support frequent movements and various postures while adding vitality to the space.

Planning for

## 10 PEOPLE or MORE

Meeting rooms of more than 10 people are usually used when there are regular meetings or important presentations. Because formal meetings are held, it is often the case that the display equipment is based on a calm and attentive atmosphere.

This size of conference room is also used as a TFT room. A collaborative system with a shared system and a board is constructed to create a bright and casual atmosphere.

Recently, multi-purpose spaces in the form of lounge has also increased. This multi-purpose space is practical for its various usages such as rest, meetings, and events.

**Space planning for TFT**

Demand for TFT rooms is on the rise as companies try new businesses in TFT form. The TFT room provides the optimal collaboration environment including the display equipment, the wiring, the board, the functional chair, and other items for convenient collaboration.

Table BeConn - 1400 Table x 2ea  
Chair Flight

**Newly restructured meeting space**

Meeting rooms are being used in a wide variety of ways. If you put a comfortable sofa in a simple meeting space, you can organize it into a new space.

Monitor holder that can be easily moved anywhere

**Lounges for various purposes**

The lounge is a complex space that can be used for a wide range of activities such as simple work, meeting, rest, and in-house events. In addition to sofas, stools, stools, and other items of various colors can be arranged together to create a lively space, and can be used according to the purpose of repositioning as needed.

Specification & Features  
BeConn

BeConn

# Design & Function

### Optional top plate (advanced type/ standard type)

You can choose between the high-end type that stands out with its sleek design and the standard type that produces a neat atmosphere.

### Various storage options

Drawers and shelves can be used to store various items.

### Double-sided opening and closing duct cover

A double-sided duct cover opens in the direction of the user, and various wiring can be arranged neatly.

### Stand-alone monitor holder

It is easy to use anywhere, so it can be used alone and conveniently.

### Mountable Monitor Holder

The monitor can be installed directly on the table, so space utilization is good.

### Vertical wiring frame

Complex wiring along the frame allows you to maintain a cleaner appearance.

### Collaboration Solutions - clickshare

The notebook or tablet (smartphone) screen can be wirelessly transmitted to the monitor. (Up to 8 lines possible)
