A CHAIR
TRANSFORMING
YOUR LIFE
THE CHAIR
DREAMING OF
MORE THAN A CHAIR

Sidiz, a chair brand, aspires to support your passionate life on chairs that define your body and space, through which you can immerse in life as a HOMO SEDENS (Seating Human). Professionalism of chair designers and engineers at the Sidiz R&D center has been building up a solid foundation to make this sincere aspiration into the promise of good and affordable chairs. Combined with cutting-edge ergonomic technologies supporting human movements to the maximum level of comfort, our smart and creative designs imbue a stronger value to your life. Determined to manufacture only the highest quality products, our uncompromising spirit of craftsmanship manifests itself in the final touches on details. Sidiz' passion for chairs your body and your lifestyle now extends towards the universal availability for global customer seeking for the higher quality in life.

sit in style

Attention to details

1. Synchronized Tilting

The seat plate and backrest tilt independently in response to natural body movements. The T51 Series tilt adjustment levers are neat and efficient, furthering the simplicity of overall style.

2. Multi-limited Tilting

The backrest tilt angle changes according to user posture and work task. The range of that tilt can be adjusted.

3. Adjustable Tilt Tension

A multitask lever is located on the side of the support under the seat pan. It can be pulled outward and then rotated to adjust the degree of tilt tension. The same lever is used to adjust seat height, resulting in greater convenience and a sleeker design.

4 | 5 | 6. Adjustable Armrest

The armrest, made of top-grade molded polyurethane, can be adjusted for height and distance to the seat front, while the width between the armrests can be altered by rotating the armrests side to side. The chair can conform to individual body types and postures, easing the discomfort in the neck, shoulders and arms that can occur after prolonged sitting.

7. Seat Slide Adjustment

Unlock the seat position by extending the paddle on the side of the underside brace. Then grasp the seat pan, sliding it forward or backward effortlessly to achieve the proper seat depth for each user. This feature assists the user in maintaining a correct and comfortable seated posture.

8. Seat Slop Adjustment

The paddle on the side under the seat pan will easily adjust the seat angle. Work tasks such as keyboarding require the upper body to lean forward. In this case, elevate the rear of the seat pan to slope the seat forward, achieving a more comfortable pelvic angle and relieving pressure on the femoral region.

9. Adjustable Headrest

The headrest minimized pressures on your neck disks with features of height and angle adjustments giving a support to either your neck area or head depending on the angle you set.

* All features are subject to change.

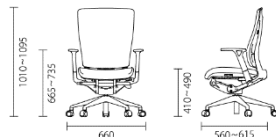

Following the human curb with simple S-line Design of T51 and your space

Rectangular frame supports backrest is as simple as body curve. All the adjustable devices with various function is applied with essential in mind. T51 series move with your body with human understanding functions and design giving you double pleasure.

T51 finished with luxury upholstery

- Adjustable (Height / Depth / Pivot) headrests
- Adjustable seat plate (Depth / Slope)
- Height adjustable pneumatic cylinder
- Polished aluminum armframe and base
- Polyurethane casters
- Synchronized tilting mechanism
- Multi-limited tilting mechanism (Able to set recline angle)
