Task chair

Everything is possible

# NEW CHAIR, FLIGHT

When the office environment starts to change from just working place to place where supports and maximizes employee's work, chairs needs to look for the new direction. Fursys considers a chair which fits with various work styles or work stations that can also function as multi-functional for diverse office environment.

**“Basic and multi-applicable chair,  
Comfortable and easy use chair”**

We now will start the journey towards our new chair Flight series.

THE NEW CHAIR  
FLIGHT<sup>SERIES</sup>

## Multi purpose

Flight series makes it possible to organize differentiated office environment that gives the inspiration to people.

### Consulting Zone

Available for all body types

### Work Zone

Easy use without complicated control

### Conference Zone

Comfortable for frequent conference

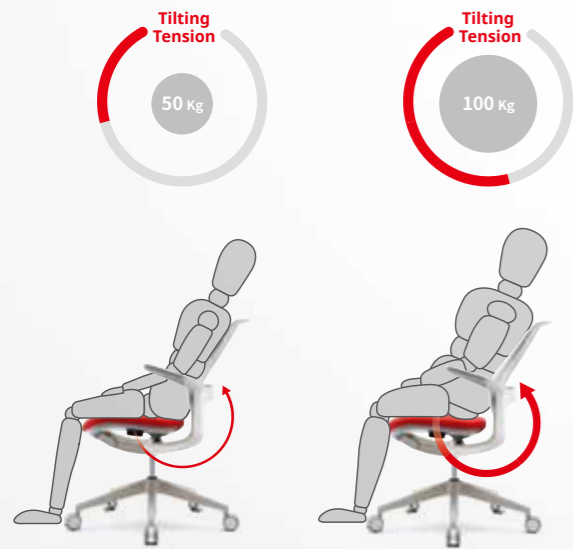

### Hospital & Laboratory

Durable and delightful even in long usage

## Performance

Flight series pursuits the ease of use instead of complicated mechanism or function. W.A.T (Weight Activated Tilt) system makes you feel comfortable without extra control. Also it is convenient to set tilting angle simply with on/off locking function.

### W.A.T system [ Weight Activated Tilt ]

The W.A.T system is a simple torsion bar link structure which does not require additional adjusting but maintains self-adjusted tension. The most frequently used height adjusting and locking function is bodied out through cable connecting method and is easily operated in the seating for user's convenience.

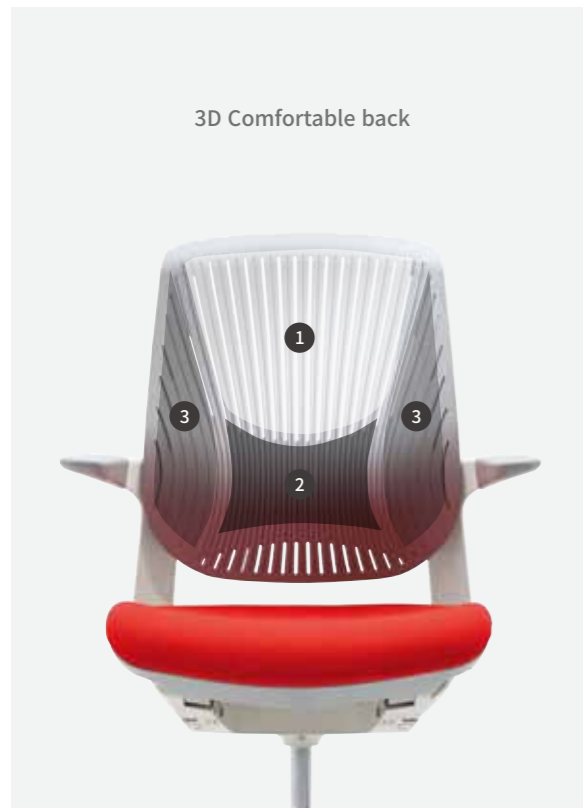

## Design

Ergonomic backrest pattern and slim integral tilt seat of Flight series help you sit delightfully.

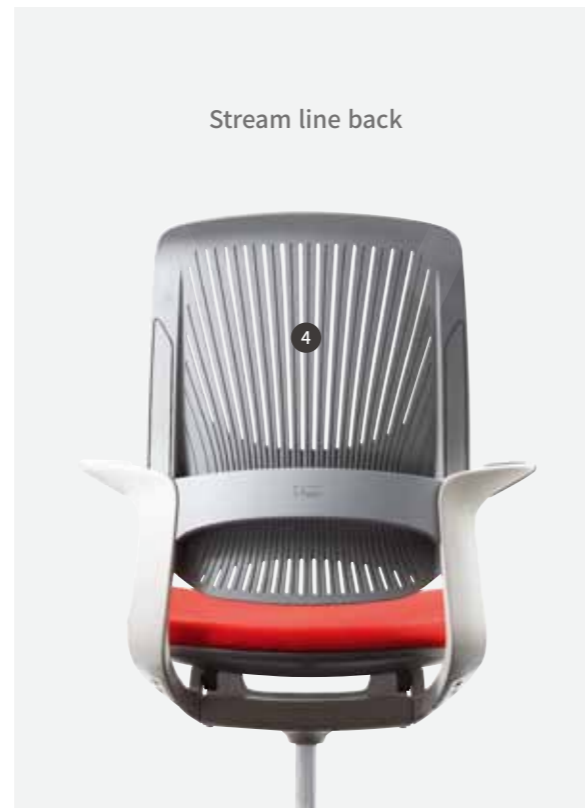

### Stream line back

Multiple dimension of backrest mechanism

Backrest consists of Lumbar zone supporting its lumbar, Bucket zone covering the back softly and Flex zone flexibly responding to user's movement.

1 Flex zone 2 Lumbar zone 3 Bucket zone

4 Air flow

### Stream line seat

Seat plate designed to distribute the load

Having slim and light design, the thickness of thin seating plate and stream line structure such as backrest on seating plate are applied

5 Inner stream line

6 Distribution of load

### Back height & Mesh back with Lumbar support

Height of backrest for a variety of positions

The height of the backrest which is under the shoulder is designated to take comfortable position while working and having a meeting.

Lumbar support for mesh back

25mm height adjustable lumbar support is applied to make your back comfortable on the optimal position.

## Different Chairs, Colorful Life

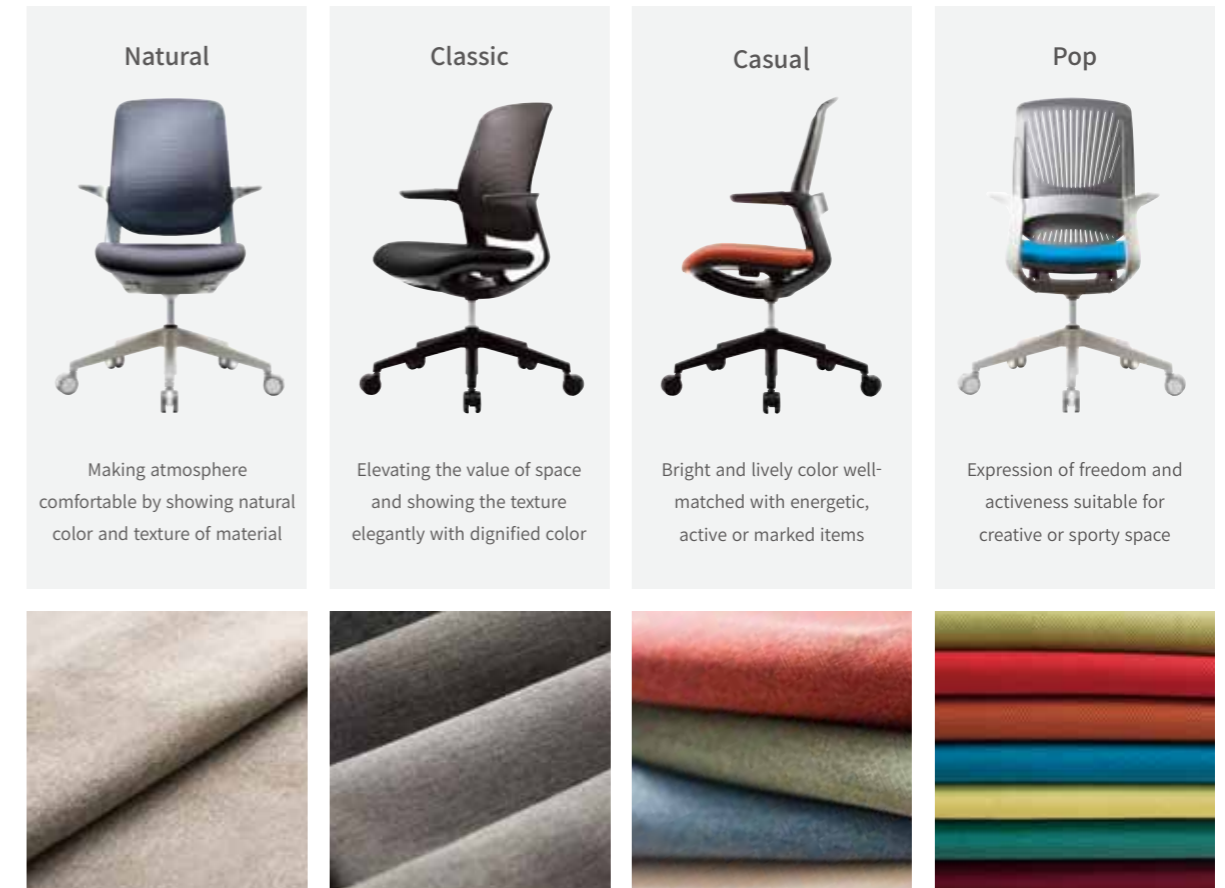

Today, working environment not only offers functionality to employee, but also contains aesthetic design and unique brand story.

### NellyRodi

Fursys collaborated with NellyRodi, one of the authoritative trend research and prediction company in France for distinct color theme.
