

Seating / Multi-use Chairs

VIM

With new folding mechanism and caster VIM family high space efficiency due to storage ability and easy moving ability. Elaborate backrest with ventilative material changes naturally by the user's movement. VIM makes upgraded communication space with comfortable seating experience even during the long meetings.

Design & Function

Tilting Backrest

The backrest tilts as the user leans back, providing a more comfortable posture during meetings or training sessions.

Multipurpose Chair

The chair design makes them easy to move and fold for storage, and their versatility makes them suitable for diverse settings.

Easy Moving

Casters of legs ensure mobility.

Mesh / Plastic Backrest

There are two backrest types to choose from. The mesh version offers excellent elasticity and air permeability, while the plastic model is perforated to provide air circulation.
