Lotus pouf

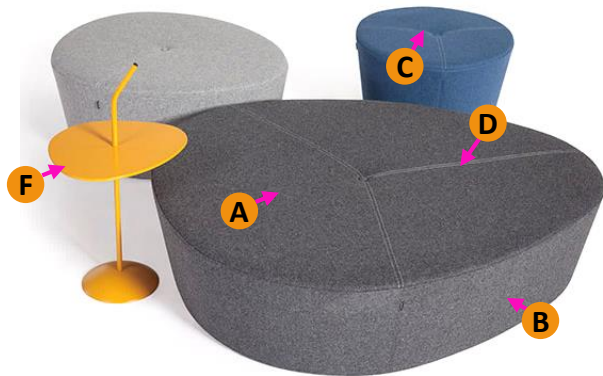

design by Wendy Liu & Alex Chai

Lotus pouf was inspired by the lotus leaf of the West Lake. There are three sizes and heights used for different applications, suitable for large or small spaces such as reception, meeting rooms, conference halls, chill-out zones for relaxation and also educational spaces.

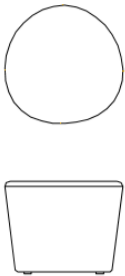

A collection of round and oval shapes combines original design with versatile functions. The structure is well-built with high-quality wood and is available in a wide range of fabrics, PU or leather.

LOTUS POUF

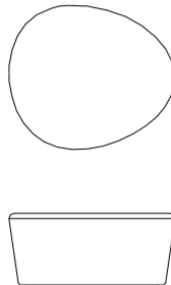

- A – Polyurethane foam cushions
- B – Commercial wood frame
- C – Plain or with button/stitch detail
- D – Optional contrast stitch detail
- E – Complementary side table
- F – Refer to Lotus Table spec sheet
