Use gentle soapy water then dry with cloth.

Spot Cleaning:

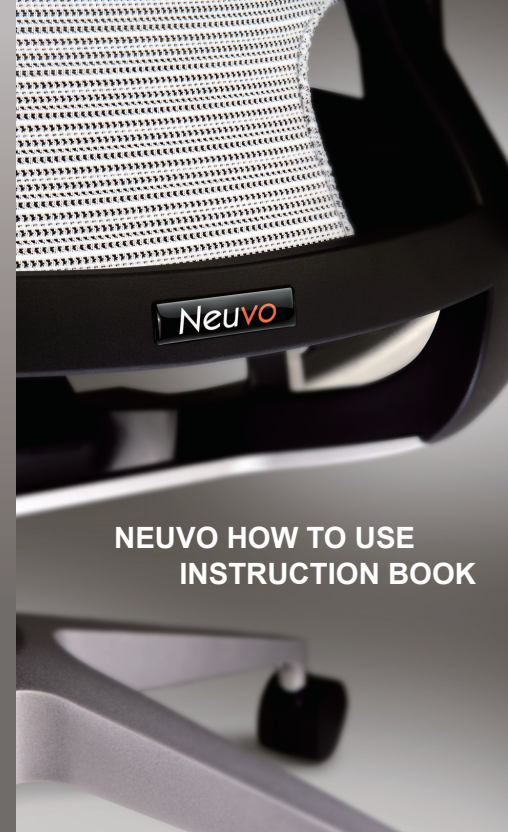

Treat all stains as soon as possible using cleaning agents in accordance with manufacturer's instructions.

WARNING

- ▲ Do not stand on this chair.
- ▲ Ensure that you are always in the correct seating position, with your feet on the floor.
- ▲ Do not use this chair unless all bolts, screws and knobs are firmly secured.
- ▲ At least every 4 months, check all bolts, screws and knobs to make sure they are tight.
- ▲ If parts are missing, broken, damaged or worn, stop use of this product until repairs are made.
- ▲ Failure to follow these warnings could result in serious injury and will void warranty.
- ▲ Hard-tyred castors are unsuitable for use on hard floors or firm chair mats in which case "soft-tyred" castors should be used. Soft tyred castors are distinguishable as the tyre is a different colour to the body of the castor.
- ▲ The foam and mesh comply with the flammability requirements of AS/NZS 4438.

**NEUVO HOW TO USE
INSTRUCTION BOOK**

Neuvo

a name which represents something

"completely new" and a "new creation."

Please appreciate her minimalist streamlines

and exquisite beauty.

Please experience the luxurious

comfort which she provides.

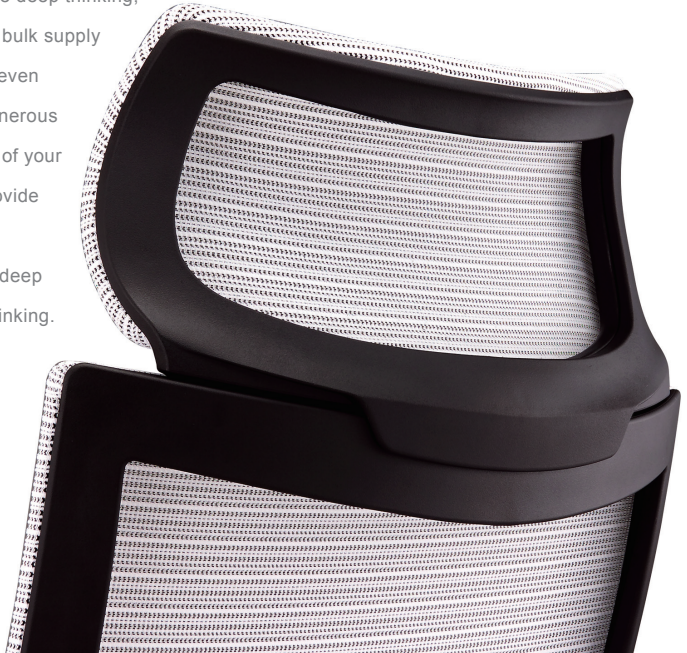

When you have some leisure time please

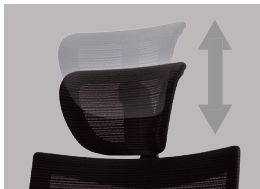

make sure to joyfully experience NEUVO !

Large Headrest

We fully understand that when you want to lay back and do some deep thinking, not only do you need a bulk supply of never ending ideas, even more so you need a generous headrest as the source of your inspiration. This will provide even more full comfort relaxation to engender deep thought and creative thinking.

Small Headrest

"Every person has an individual body type."

You can adjust the headrest to suit your personal height requirements.

You can even adjust the NEUVO headrest to your personal angle requirements at the time.

Height Adjustable Arms

By pressing on the button on the outside of the armrest you can adjust its height to your personal requirement. Enabling you to firmly grip your mouse, maintaining a right angle (90o) between the forearm and upper arm is always the most comfortable position.

Seat Slider

If you feel tired or just want a break, lift the trigger on the left side of the seat to extend the seat slider and push the seat forward. Or to retract the seat, lift your weight up off the seat, lift the trigger on the left side and push the seat back in.

Arm Pads Swing & Slide

If you are a long term computer user, we recommend that you occasionally change positions and posture. NEUVO armpad's forward extension as well as inward and

outward pivoting provides you with the optimal support while it also empowers you with maximum flexibility of adjustment options.

Lumbar Support

Do you like the way that NEUVO hugs and supports your entire back ?

If you like you can even select the adjustable lumbar support option to provide you even more back support.

All you need to do is reach behind with both hands, gripping the soft sides of the lumbar support and easily slide the lumbar support up or down according to your personal requirements for optimal personal comfort.

Height Adjustment

The lever located on the right side below the seat enables you to adjust the seat height to your optimal comfort level.

Gently lift the lever upward while standing up, in order to raise the seat height; or be seated, in order to lower the seat.

Please notice the hand wheel which has a line embossed on it, similar to a smiley face.

Gently turn in the "+" direction in order to increase the strength of the tilt action ; gently turn in the "-" direction in order to soften the tilting action.

Tilt Lock

The lever below the seat on the left hand side allows you to lock the tilt in any position when you want to lie back and relax. Please gently pull the lever to the horizontal position and when you have reclined to the desired angle gently push the lever downwards in order to lock the angle. To release the locked position please gently lift the lever to the horizontal position and lie back until you hear a soft "click" which indicates that the tilt lock has been unlocked. Then you can let the back return upright to your working position.
